A Revolutionary Change in Computer Support

Netlink takes a different approach to computer support. Rather than just respond to problems after the fact, we use our state-of-the-art automated systems to check your systems proactively every 5 or 15 minutes. We'll nip problems in the bud before - not after - they disrupt your business.

Does your computer support company:

- Keep you safe by automatically checking your backup every day?
- Keep you in contact by automatically checking your email systems every morning?
- Keep you running by checking your Windows services, TCP ports and network connections every few minutes?
- Keep you safe by checking for hacker attacks?
- Keep you safe from harm by automatically checking your anti-virus systems each and every day?

Netlink conducts dozens of checks on your systems every five or fifteen minutes. We can spot many problems before they occur. And we'll get instant alerts about others - usually before you know you have a problem - so we can fix them before you experience the pain of downtime.
